

Lyndon Township is Recruiting Road Committee Volunteers

The township is seeking four volunteers to serve on its Local Roads Advisory Committee. Experience in construction, project management, communications, policy, government infrastructure, or board service is desirable. Estimated time commitment is about ten hours per month.

Reporting to the township Trustees, responsibilities of this Committee will include:

- Project oversight: act as Lyndon Township's liaison to the Washtenaw County Road Commission (WCRC) for specified road repair/maintenance projects
- Funding planning and prioritization:
 - assess costs/benefits of a township-wide Special Assessment District vs. Local Roads Millage vs. township General Funds expenditure
 - evaluate WCRC cost estimates
- Best practices: identify and make recommendations regarding best practices in road treatment and construction and related drainage, including maintenance of existing roads and shoulders, dust control, landscaping, tree protection or removal, tree and weed trimming, snow removal and salt applications, signage and road marking, and drainage above and below ground [I removed street illumination—couldn't think of a spot in the township where we have/expect any]
- Communications: recommend, develop, and implement information for
 - the general public
 - property owners contiguous to any upcoming/ongoing projects impacting township roadways
- Policy:
 - recommend changes to State and local laws and law enforcement, such as regulations pertaining to road classification and funding, speed limits, weight limits, WCRC accountability, etc.
 - recommend a process to advocate for such changes in policy

If you are interested in serving on this committee, please email a resume or a paragraph about your relevant experience to Pam Byrnes, Township Supervisor, at supervisor@lydontownshipmi.gov. Please apply by April 28, 2023.
